## ***PRESS RELEASE***

---

### **Definitive Feasibility Study**

---

**Vancouver, BC – September 29, 2011 – New Guinea Gold Corporation** (“NGG” or the “Company”) has appointed GR Engineering Services to conduct a Definitive Feasibility Study into the installation of a CIL / CIP Processing Plant at the Sinivit Gold Mine.

Greg Heaney, Acting CEO, commented: *“It is the Company’s belief that there may be economically recoverable gold remaining in the vats and heaps constructed for the initial leaching operation. This Definitive Feasibility Study will test the remnant material, which will total in excess of 400,000 tonnes when the current program concludes, plus an additional high gold / high copper orebody estimated at around 50,000 tonnes, to determine whether the precious metal content can be liberated using an agitated leaching process.”*

The Company has estimated that the cost of the Definitive Feasibility Study will not exceed A\$500,000 and should be concluded by February 2012.

For further information on this release or on other NGG projects such as the Sinivit Gold Mine, please contact [info@newguineagold.ca](mailto:info@newguineagold.ca), or access our website – [www.newguineagold.ca](http://www.newguineagold.ca)

ON BEHALF OF THE BOARD

**Greg Heaney**  
**ACTING CEO**
